

Next Generation Carrier Cloud VAS

# NEC Cloud Storage

**Expand your world. Take control of your files, media and apps by using unlimited cloud storage. Now you can access your corporate information anywhere and from any device.**

Always with you

- Synchronized online and offline access to your cloud files from multiple devices

NEC Cloud Storage is a carrier oriented online storage platform integrated with multiple fixed and mobile devices for ubiquitous information access. NEC Cloud Storage features the Intelligent Cache technology that stores on your local device the most commonly used files for flawless offline access. Scale the data repository size in real time based on pay per use business model.

**Mobility**

- 3G Modems, Mobile, PC, Mac

Open new horizons for cross device information repository. NEC Cloud Storage is natively integrated into multiple devices granting truly mobile information access. Now you can seamlessly access virtually unlimited corporate and personal files repository anywhere and from any device. Intuitive web access interface is available for managing the information from alien PCs.

**Security**

- Encrypted, SIM Bound, Managed

The security of the stored files is guaranteed through strong real time encryption algorithms. NEC Cloud Storage service can be bound to carrier SIM authentication to enhance client loyalty and user validation. Specific corporate policy enforcement features are supported to ease the management of sensitive data access.

**Collaboration**

- Teamwork, Sharing, Cooperation

NEC Cloud Storage is designed to bring you the most flexible sharing capabilities available on the market. Access your personal and group cloud file space to share files with your team. Share your files through secure time stamped links using multi target share and access control functionality. Enhance your team productivity and efficiency with cooperative files management features.
