

UNIVERGE SV8300 Communications Server

Fulfilling the promise of UNIVERGE®360

The speed of business today demands efficient, seamless communications to enable rapid decision-making and customer responsiveness. To succeed at this accelerated level, businesses must have the right communication tools. NEC provides those businesses with the communications and networking solutions that enable them to succeed.

At a Glance

- Scalability for the growing business
- Support for VoIP and traditional voice
- High reliability
- Enhanced centralized management
- Increased productivity
- Diverse features
- Seamless networking

The UNIVERGE SV8300 Communications Server is a robust, feature-rich solution that is completely scalable and can be expanded to meet an organisation's communications needs now and in the future.

Scalability for the growing business

The SV8300 functions alone or in a network and can expand to meet all of your business communication needs, including mission-critical data applications.

Support for VoIP and traditional voice

You can deploy a pure IP solution or any combination of IP and traditional circuit-switched technology on a single SV8300. It provides the ability to customize the best communications solution for your business.

High reliability

The architecture of the SV8300 is ideal for missioncritical situations and ensures highest availability and business continuity. Besides its flash technology for system reliability with a very high MTBF, IP fail-over for stations and trunking and clustered survivability, CPU redundancy provides high availability and operational continuity.

Enhanced centralized management

The SV8300 offers centralized management of phone system, data system and enterprise platforms; moves, adds and changes of SV8300 phones are quick and easy. Simply plug any phone into any jack wherever it's needed. It's ready to go!

Investment protection

Protect your technology investment while providing a migration path to pure IP. The SV8300 has the flexibility to support your existing traditional circuit-switched technology and can be fully utilized to run in a pure IP environment.

Increased productivity

The SV8300 delivers a full suite of advanced applications and a high-powered feature set that helps businesses run smoothly. Workers can manage their calls more easily, and the mobility that the SV8300 provides to staff helps customers access your employees even while they are away from their desks.

No other solution provides medium-sized businesses with more versatility than the SV8300. Designed to be both versatile and scalable, the SV8300 meets a growing business's needs. All communication methods are supported – whether IP, video or Wi-Fi. Its resources and features can be transparently shared between branches or remote locations by networking SV8300s, which provides a lower total cost of ownership.

Any medium-sized business can benefit from the advanced, enterprise-grade applications supported by the SV8300. The SV8300 offers a full range of advanced features to select from.

Business ConneCT offers advanced communications functionality including pc-based call control, real-time call and presence information, voicemail, directory services, Instant Messaging and sophisticated Call Centre call routing, all from a single application. Functionality is grouped into three roles: Operator, Agent and Employee. A single multi-lingual user interface enables users to switch roles easily to form a flexible workforce.

Diverse features

The SV8300 streamlines communications for the entire organization with its diverse suite of features and applications. It enables individuals, departments and locations to work more efficiently by ensuring seamless internal and external communications.

Support is provided for a wide range of tools and features that enhance productivity. Features including Calling Number and Name Display, Conferencing, Soft Keys, Voicemail, Unified Messaging and Speed Dialling are all supported. Cordless and wireless handsets and softphones provide cost-effective mobility and convenience.

Windows®-based PC Pro provides centralized online HTML-based programming access. With this intuitive browser software and its easy-to-follow wizards, programming is simplified and the time needed to complete it is reduced.

Seamless networking

The SV8300 provides IP communications, such as data, multimedia and voice, over one network. There is no need to run two sets of wires for voice and data; one wire does it all.

Branch or remote locations can be seamlessly linked to share resources and features through peer-to-peer connectivity; the SV8300 easily links to other NEC communication servers such as the SV8500. A geographically distributed unified system with a single image can be produced by using NEC's UNIVERGE MA4000 Management System to ensure application integration, feature transparency and survivability in the event of network failures.

For medium-sized businesses that want the communication capabilities of a large enterprise, NEC's SV8300 Communications Server provides the scalability and flexibility to meet all of your communication needs.

UNIVERGE®360 is NEC's approach to unifying business communications. It places people at the center of communications and delivers on an organization's needs by uniting infrastructure, communications and business.

About NEC Corporation: NEC Corporation (NASDAQ: NIPNY) is one of the world's leading providers of Internet, broadband network and enterprise business solutions dedicated to meeting the specialized needs of its diverse and global base of customers. NEC delivers tailored solutions in the key fields of computer, networking and electron devices, by integrating its technical strengths in IT and Networks, and by providing advanced semiconductor solutions through NEC Electronics Corporation. The NEC Group employs more than 150,000 people worldwide. For additional information, please visit the NEC home page at: <http://www.nec.com>
